About Smartvel

Smartvel is a content technology company focused on enhancing the traveler experience through visual and interactive digital solutions and increase conversion through AI-powered digital solutions and meaningful content that is delivered through easy-to-implement widgets and API connections.

With Smartvel's content and solutions, travelers will have at their disposal all the plans they can make during their stay at the destination, from visiting monuments, museums, etc. to participating in the events and activities offered by the destination.

Through Smartvel's digital offering, our clients obtain the dual benefit of promoting their destinations through their digital channels and enjoying marketing tools and content to increase the relevance and promotion of their business on the web, apps, and social media.

Since 2013, combining AI-powered technology and content creators to provide curated, personalized content and solutions.

The largest library and distributor of travel content, offering destination guides for over 630 locations worldwide.

Specialized location intelligence for Travel and Real estate industries, offering map layers and location scores for booking platforms & websites.

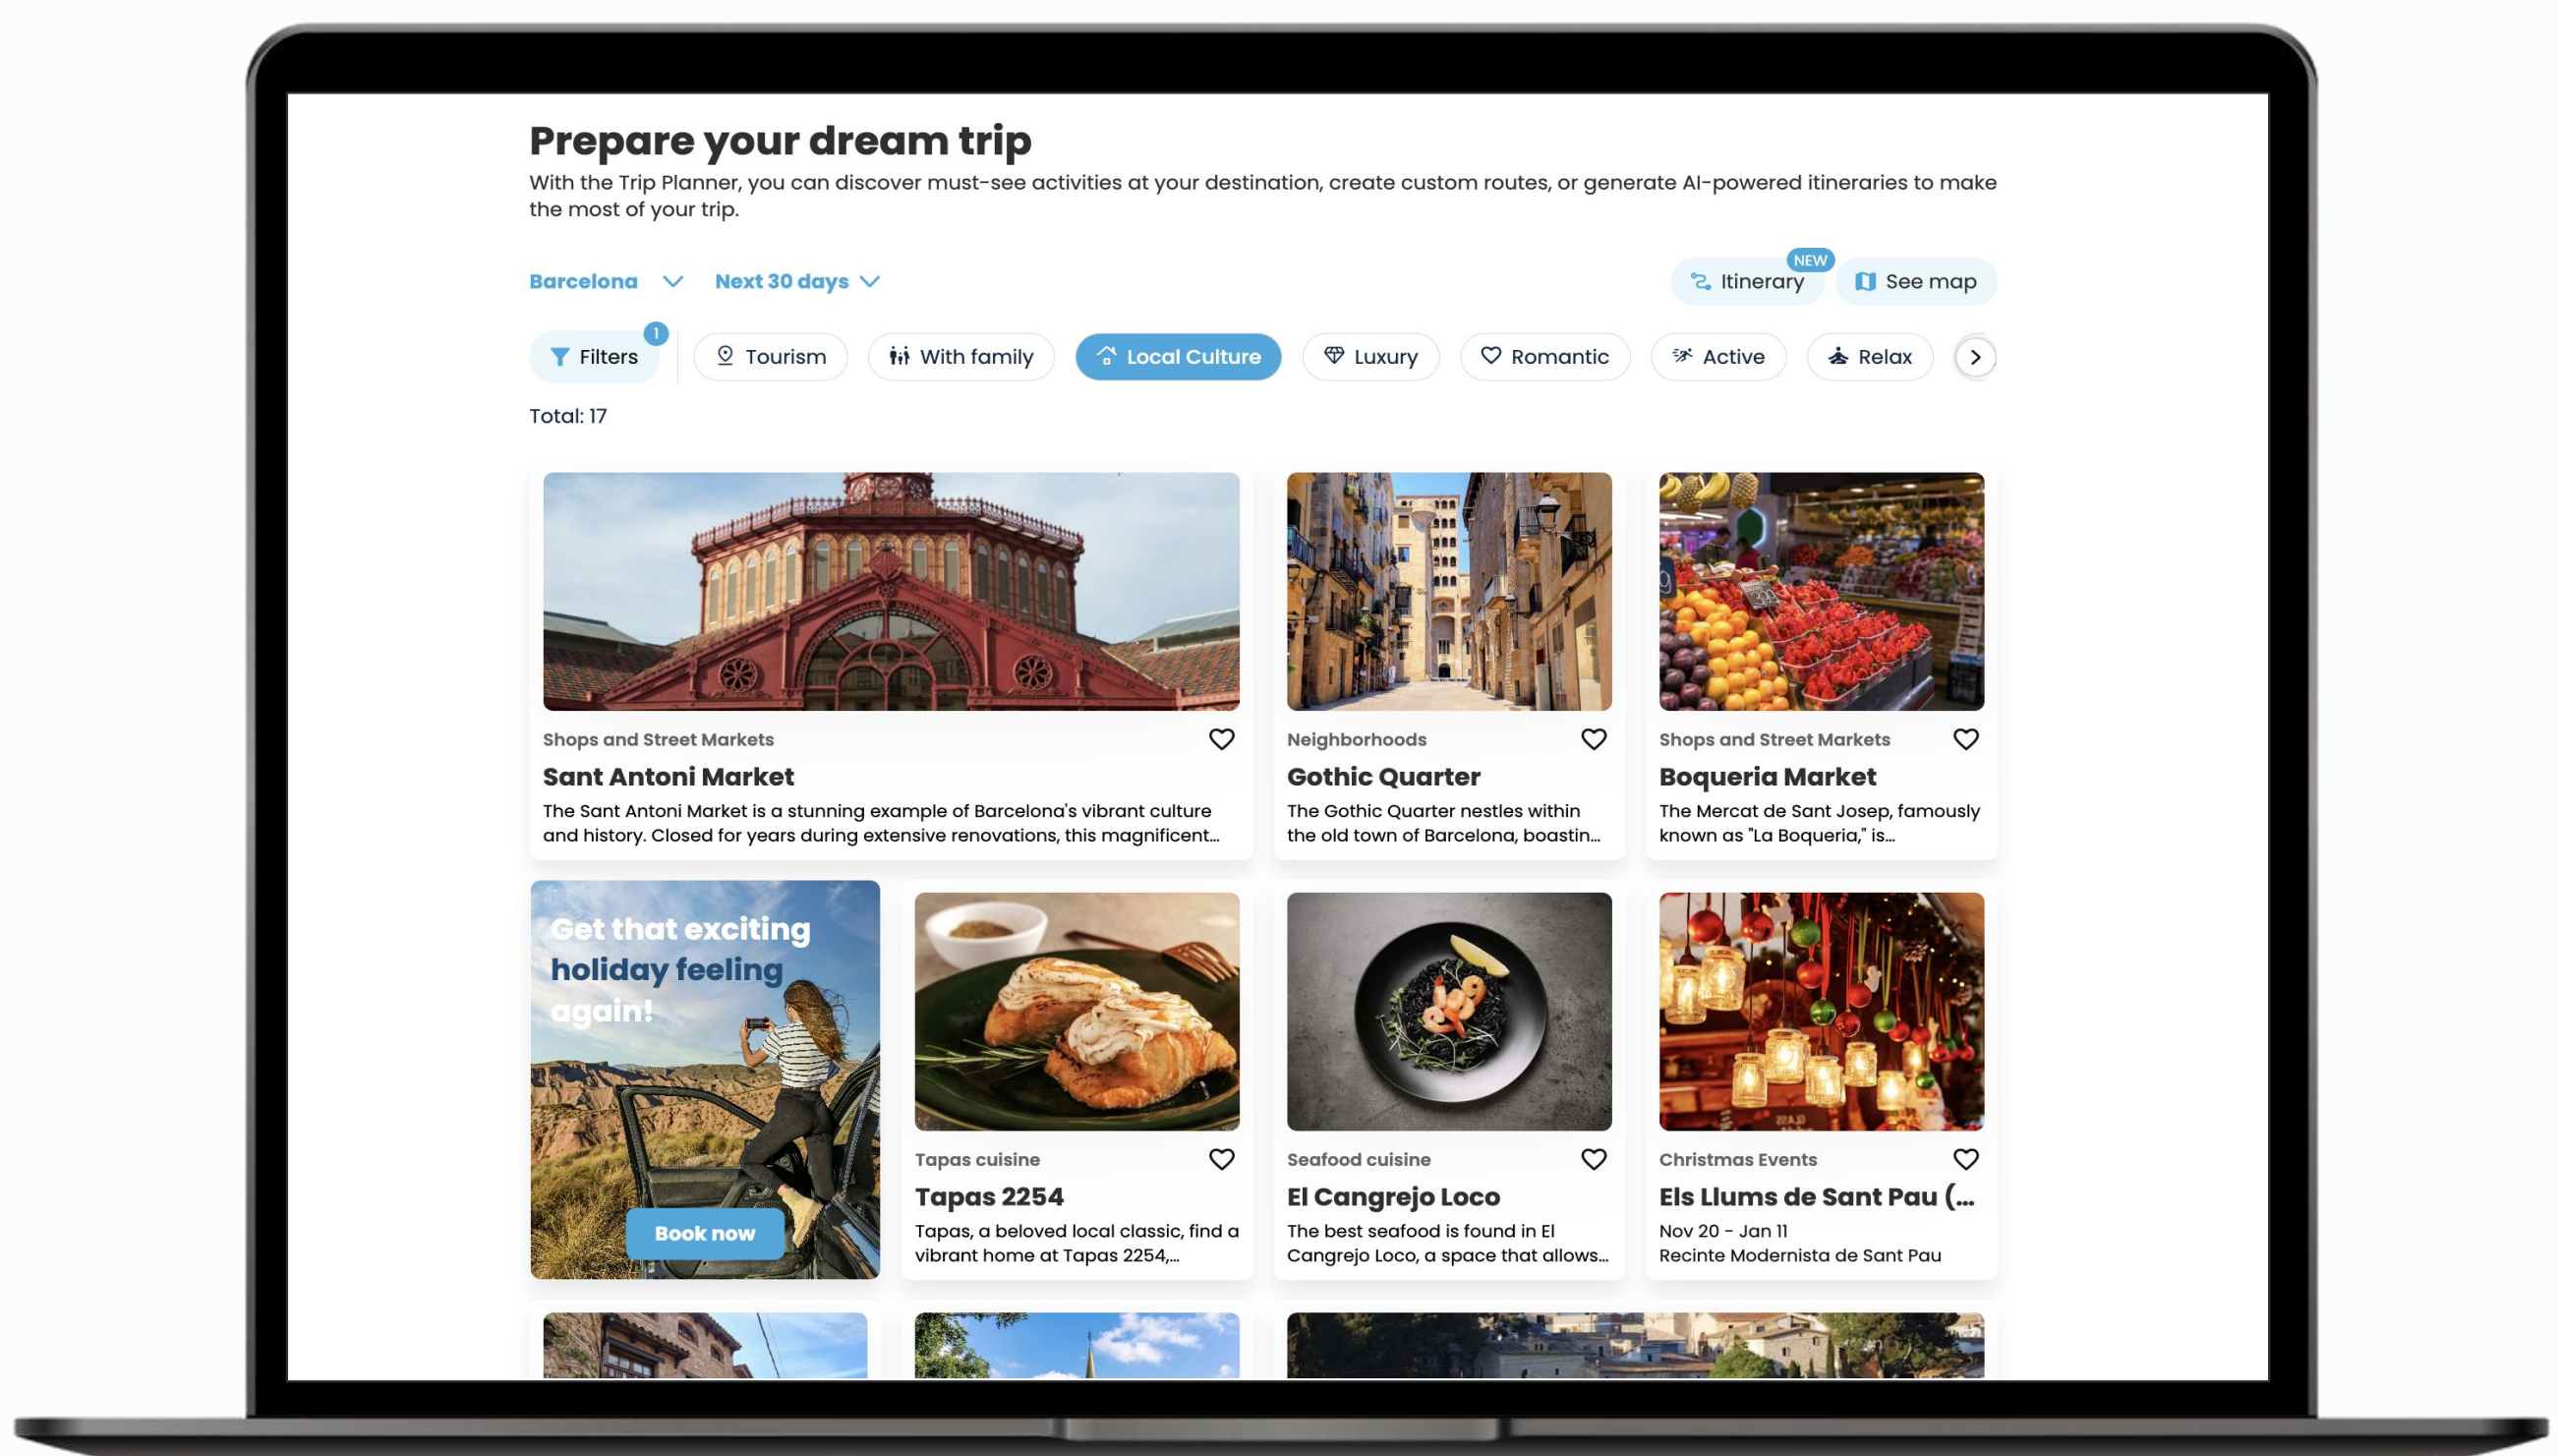

Smartvel Trip Planner

An interactive widget that transforms how travelers discover, plan, and book their journeys—all within your digital ecosystem. From inspiration to booking, Trip Planner combines enriched destination content, personalisation, and monetization opportunities to guide users through their entire travel cycle.

Trip planner is a solution that helps users easily discover what to see, do, and enjoy in different destinations through our enhanced content, while also enabling conversion and monetization at every stage of the trip.

Offer your travelers the convenience of booking hotels, tours, and activities, along with ancillary services all seamlessly integrated into their trip planning experience

Everything happening at your destination within reach of your customers.
Use it before, during and after your clients trip.

Our content

Much of our content is 100% curated by our dedicated content team. We also utilize AI technology to processes over 2 million events annually, drawing from a vast network of 900+ online sources, Open Data, travel blogs, and activity suppliers

Smartvel's content offering can be divided into **three main categories**:

Static / Classic Content: includes points of interest, restaurants, hotels... This content is curated and periodically reviewed by our Content Team.

Dynamic Content: the live agenda of a destination, bringing together all cultural, musical, sports, and local activities. We use highly advanced technology and AI to generate this content.

Third-Party Content: this layer includes tours, activities, and any bookable events. It is fully customizable for each client, allowing integration with any provider our client has an agreement with.

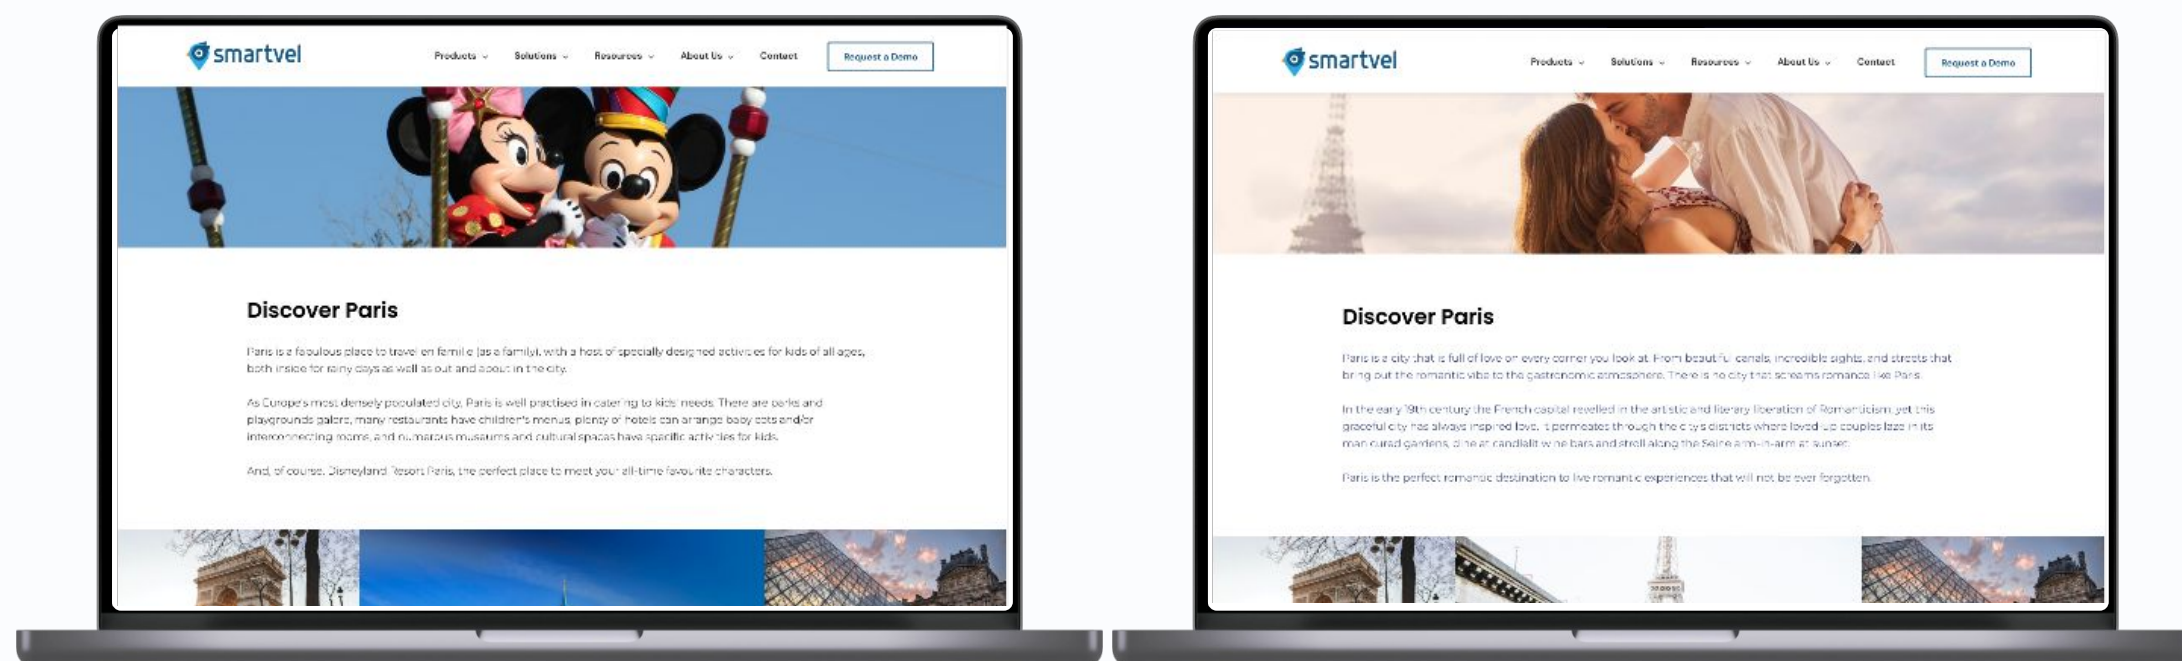

Persona segmentation

One of the most valuable aspects of Smartvel's content lies in its high level of personalization.

Thanks to our labeled and well-categorized database, each traveler receives recommendations and information that truly match their **interests, travel profile, and destination**.

This same structure also enables our partners to easily segment audiences and design more effective campaigns, promotions, and customer communications

Route & Itinerary Creation

1. Create Routes from Favorites

The platform allows users to select their favorite points of interest or experiences and generate a personalized route based on those selections. This feature gives travelers control and flexibility when planning their trip.

Additionally, users can:

- Export the itinerary directly to Google Maps
- Share it via a direct link, making collaboration and coordination with travel companions easy.

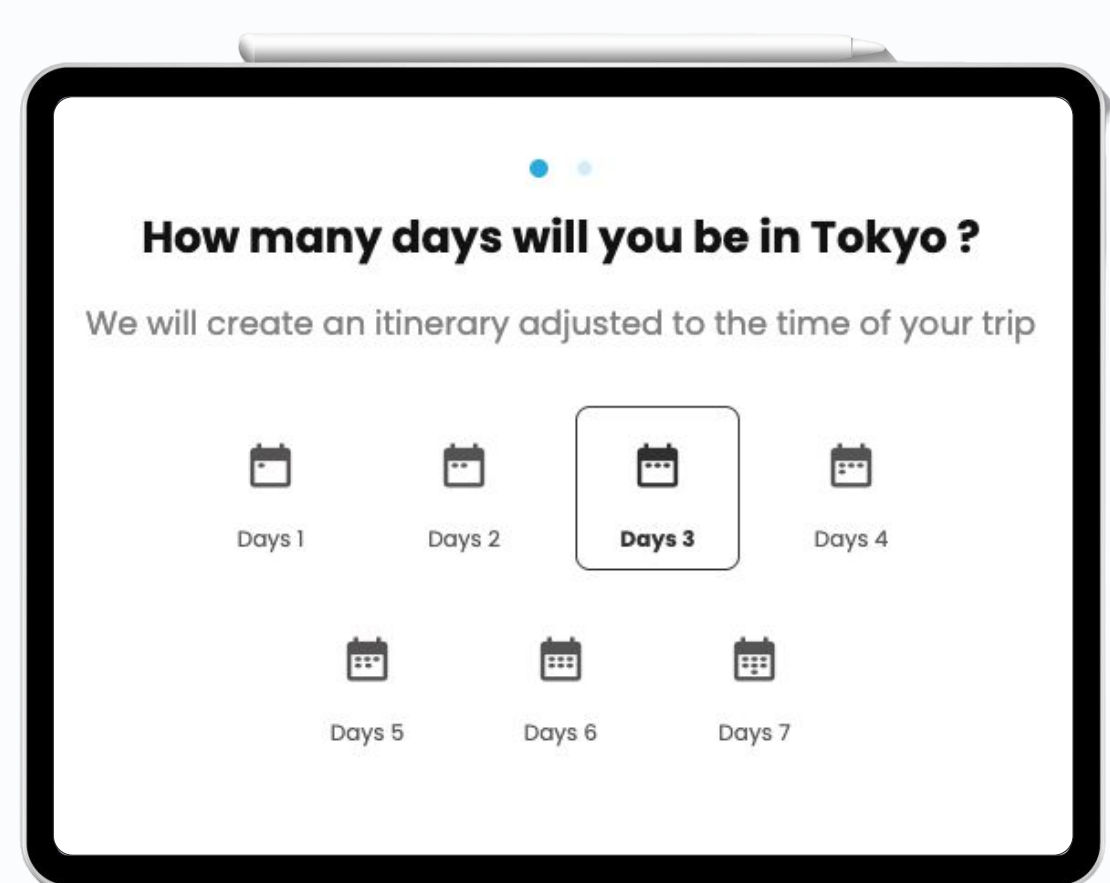

- Create an itinerary based on your favorites

2. Automatic Itinerary Creation

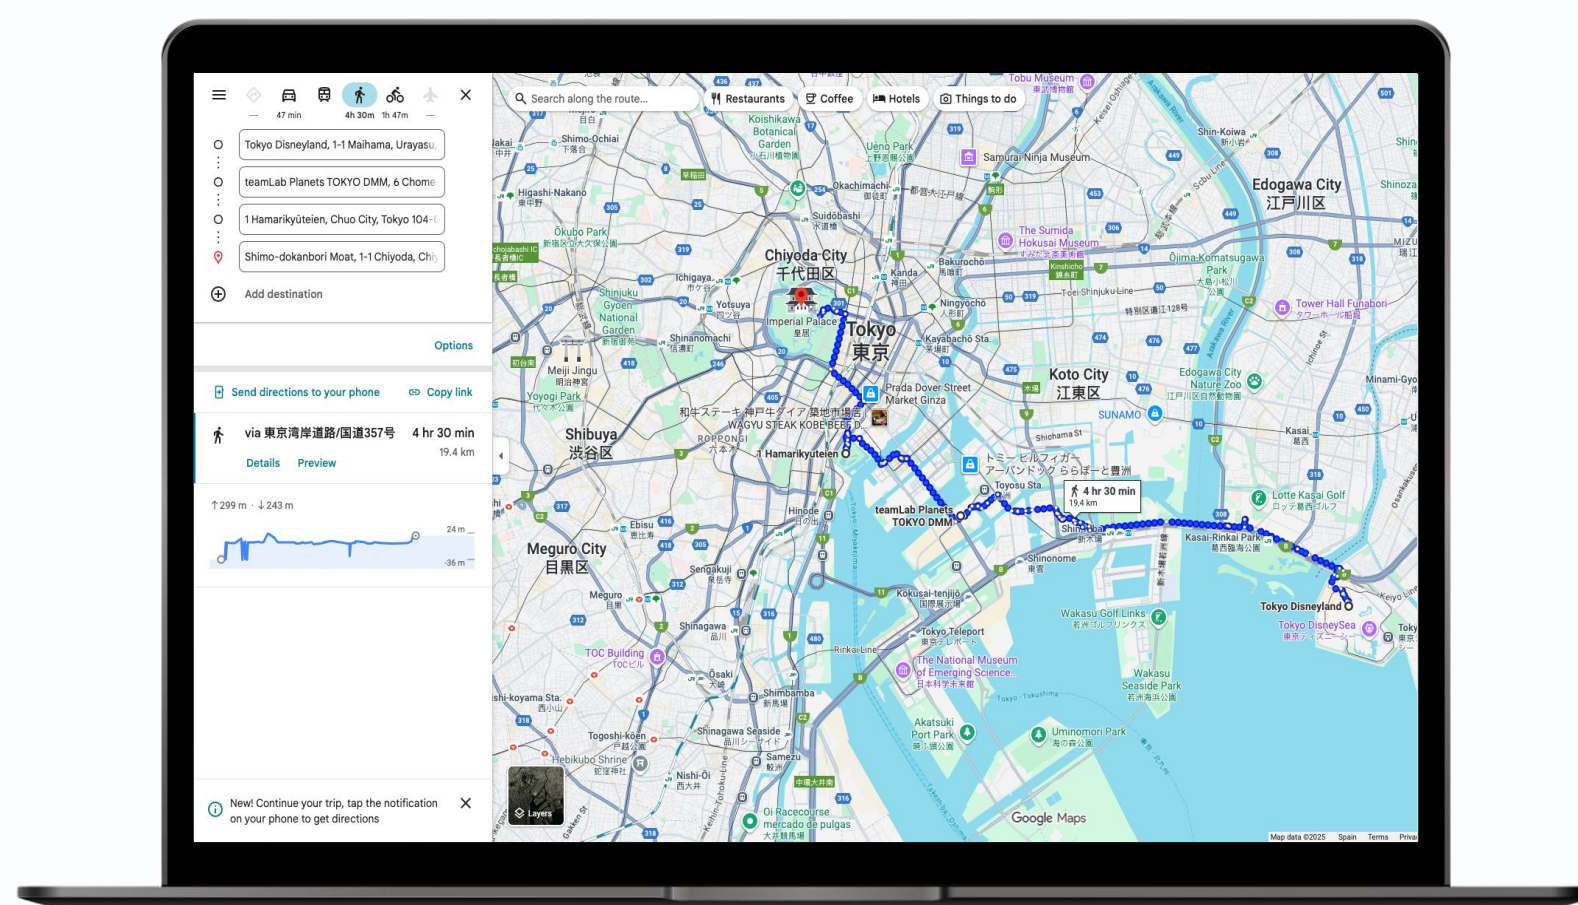

The tool also offers the option to generate an itinerary automatically, based on:

- The traveler's preferences (interests, type of experience, pace)
- The number of days in their trip.

With our in-house algorithm and Smartvel's up-to-date data, we create itineraries that are not only precise but perfectly suited to each traveler's needs.

- Choose how many days you will stay

- Export to Google maps

Marketing Use Cases

1. Web / App Landing Pages

Embed the planner on key pages to move users from browsing to planning, increasing engagement and conversion intent.

2. Email Marketing

Use deep links to pre-filtered themes (e.g., *Romantic Trips in Italy*) to make newsletters actionable and boost CTR.

3. Social Media & Paid Campaigns

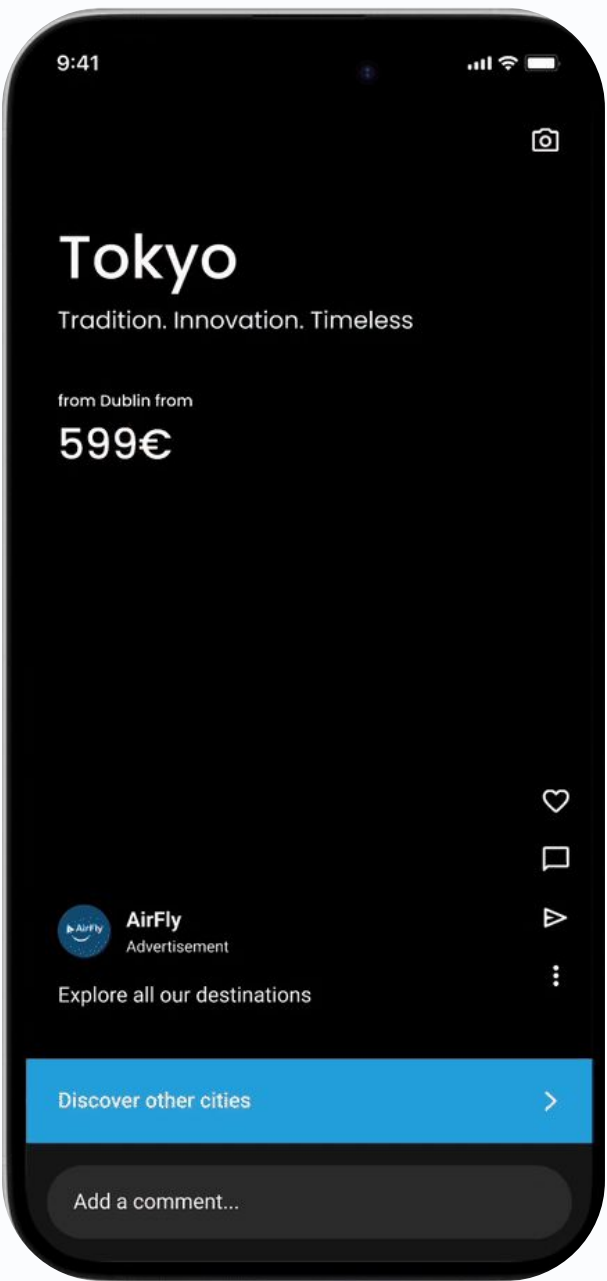

Drive ads directly to curated planner views (e.g., *Getaways Under \$300*) to turn clicks into real trip exploration.

4. Abandoned Cart Campaigns

Re-engage users who started but didn't finish booking by sending them back to their saved destinations, favorites, or trip ideas.

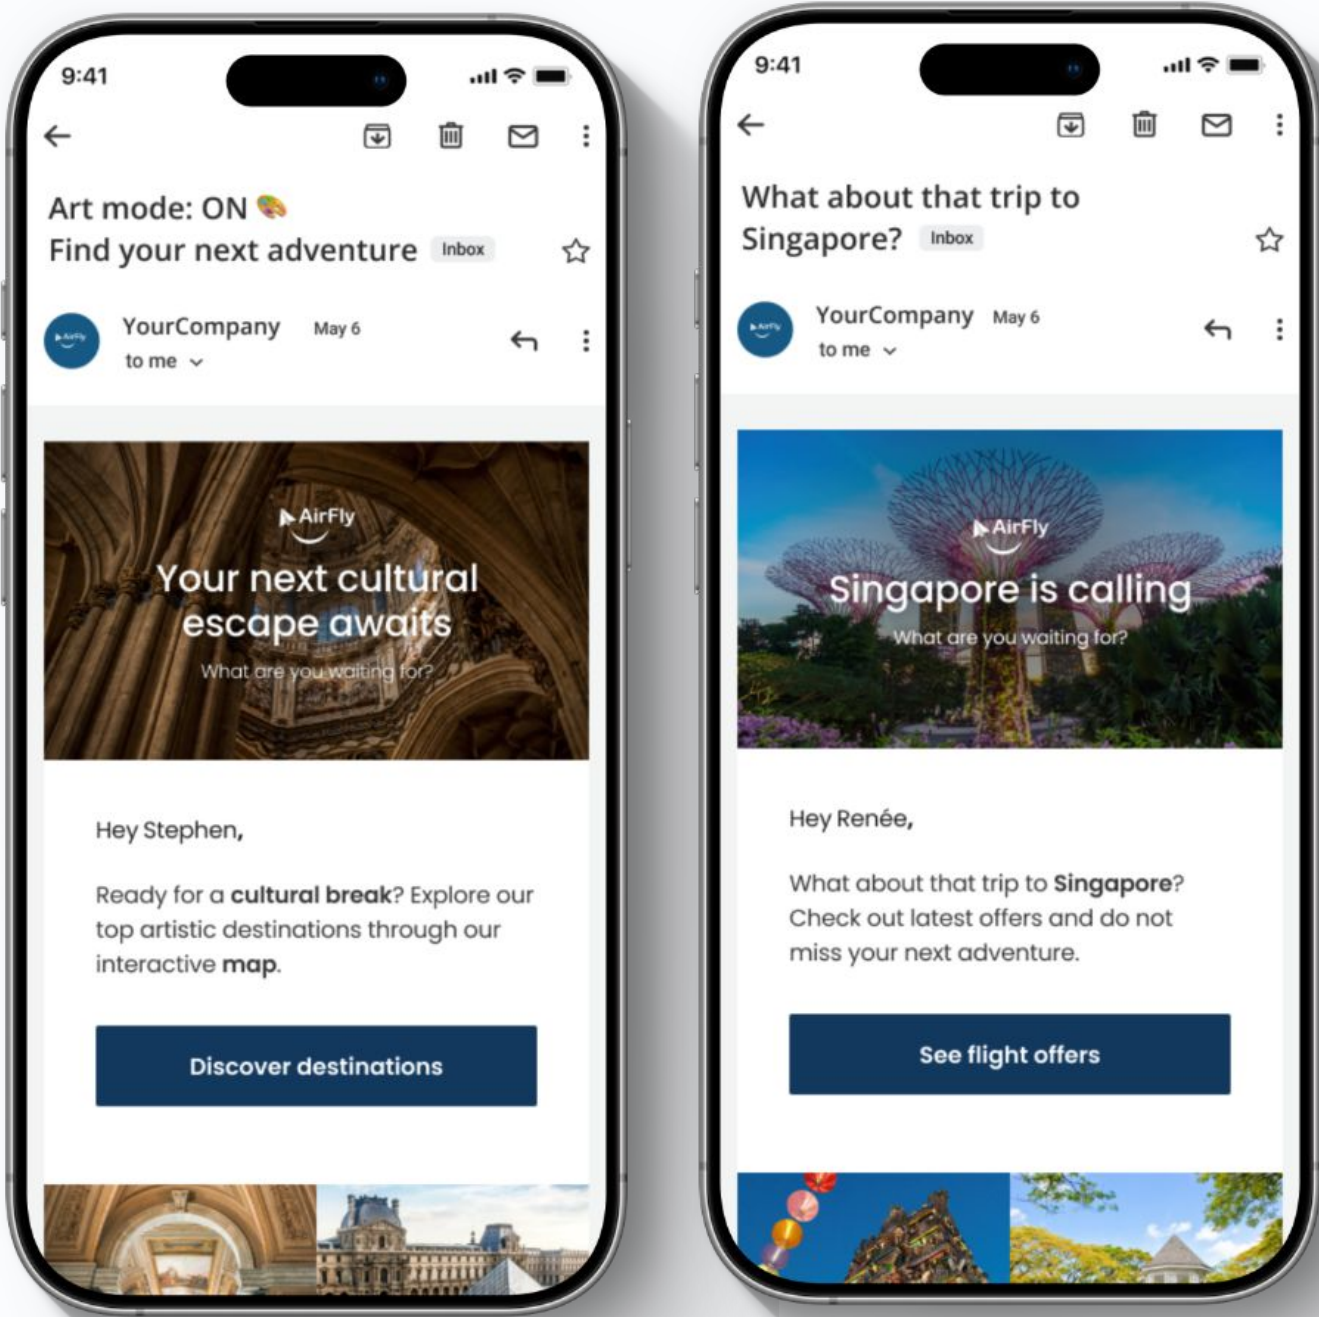

5. Monetization Campaigns

Highlight hotel, tour, or car rental offers inside the planner, right when users are inspired, to increase ancillary revenue.

Ads that convert

Run Meta, Instagram or TikTok ads linking to TripPlanner, filtered by interest, city or budget

Interest-related

Send offers with a selection of destinations or link to Explore&Go pre-filtered by interest

Benefits **for your company**

Attract
Showcase destinations through visual, interactive experiences

Inspire
Connect personal interests with unforgettable experiences

Retain
Keep users engaged with compelling, relevant content

Technical **Integration & Flexibility**

Seamless Implementation

Trip Planner integrates effortlessly into existing digital ecosystems whether airline booking platforms, hotel websites, or travel agency portals. The widget adapts to your brand guidelines whilst maintaining its powerful functionality.

Integrating it is incredibly simple — just a few lines of code are enough to display the widget and activate all its features instantly:

- Responsive design for all devices
- Customisable branding and styling
- JavaScript event tracking
- API-based content management
- Multi-language support
